

★ LAST ★ COLOR ★

START

Genre

- Action
- First-person
- Arena-based
- Short-session
- Stylized

Mechanics

- Projectile Combat
- Resource Management
- Evasive Movement
- Boss-focused Encounters
- Visual Feedback System
- Difficulty Scaling

Area

Color-decaying enclosed arenas

- Intro Arena
- Open Combat Arena
- Constrained Combat Arena
- High-Pressure Arena
- Final Boss Arena

The Game

Target Platform

itch.io, PC, Mac

Engine

Unity

Narrative

When a mysterious villain begins draining color from the world, everything slowly fades into grayscale. As a hero fighting to restore it, you must confront the source of decay, defeat the force behind it, and bring life back to a fading world.

Game Content

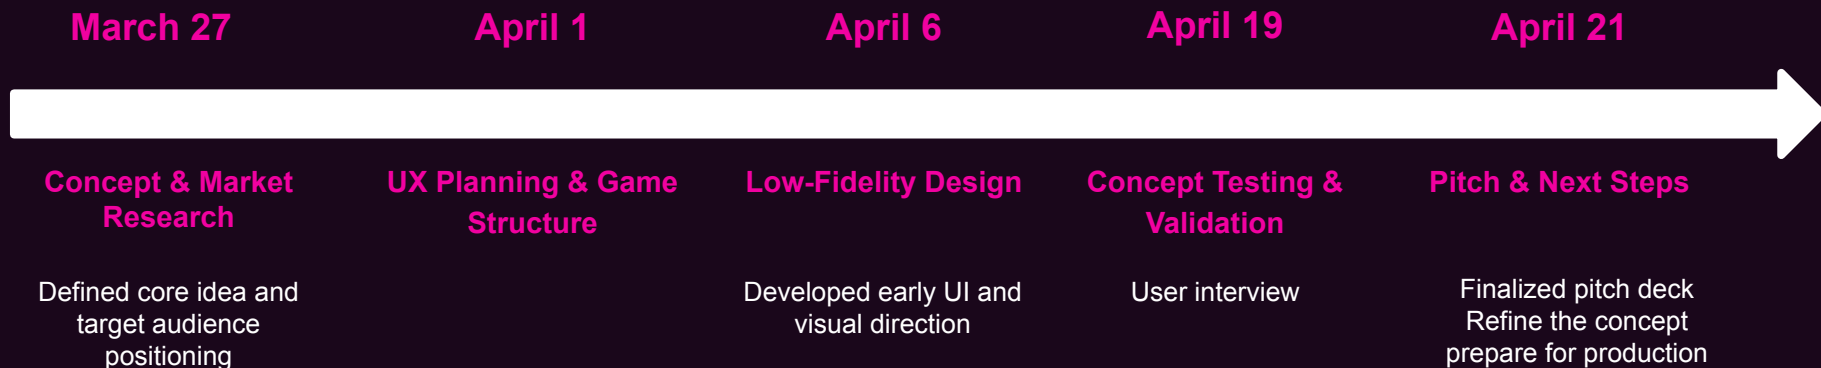

- 5–10 min per level (starting difficulty)
- 2 possible endings
- 5 difficulty levels

Target Audience

- Ages 18–23
- Casual to midcore players
- Action game players
- Short-session players
- Visual-driven players

The Timeline

Market Validation

Why Color as Core Mechanic?

Builds on proven high-contrast visuals and minimalist design:

Horizon Zero Dawn

- High contrast improves threat detection
- [Up to 42% faster player reaction](#)

SuperHot

- [White, black, and red provided a high-contrast palette](#)
- White environments with sharp red enemies
- No complex textures or detailed scenes

Underrepresented in browser-based platforms and short-form video advertising

Why This Combat Structure Works?

Hades

- Progression → challenge → boss completion
- Combat with resource collection
- Enclosed combat spaces

SuperHot

- First-person perspective

Five difficulty skill levels

Narrative progression with two possible endings

Why Short Sessions (5-10 min)?

[Gen Z gamers play on mobile at 69%. PCs at 42%](#)

College students rely on computers for daily academic use

Fits play between classes and short breaks

Planned for browser-based release (itch.io)

Free to play

- In-game ads
- Rewarded videos

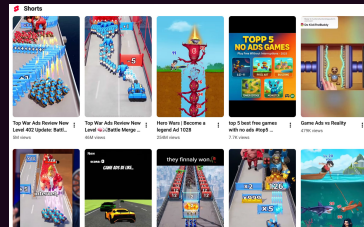

Game in pre-production, no funding needed

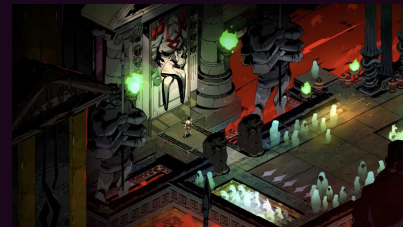

Horizon Zero Dawn Color contrast for threat detection

SuperHot High-contrast visuals + first-person perspective

Current top-performing short-form game ads

Hades: progression-based combat loop

Game Comparable

Hades

PC release (Epic Games Store)
Platforms: PC, Switch, PlayStation, Xbox
Price: \$24.99
[7.7M+ copies sold](#)

- Arena-based combat progression
- Fast-paced action loops
- Strong visual feedback

Our Game:
Delivers similar combat-driven experience as Hades, but in shorter, lightweight sessions

Superhot

Platforms: PC, Xbox, PlayStation, Switch
Price: \$24.99
[\\$13M Steam revenue](#) + [87% positive reviews](#)

- High-contrast visual system (white, black, red palette)
- Minimalist environments with clear enemy visibility

Our Game:
Turning color into an core interactive gameplay mechanic

AXES.io / Axe Throw

Platforms: IOS, Android, PS4, Xbox, Switch
Price: Free

- 2-minute matches
- Simple, easy-to-learn mechanics
- Instant play, low barrier to entry
- Widely adopted across mobile

Our Game:

- Builds on projectile-based combat (throwing mechanics)
- Translates the .io quick-match format into a structured, level-based system

Our Ask

The Ask

Approval to proceed to prototype development, with no funding required at this stage, and support for platform featuring, influencer partnerships, and short-form promotional distribution

Distribution Plan

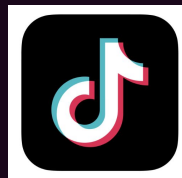

- Unity WebGL browser release on itch.io (no download required)
- Low barrier to entry and easy sharing for early access
- Potential expansion to additional indie platforms

Support we need

Influencer Partnerships (10K–100K followers)

- Creators focused on indie, casual, or short-session gameplay
- Platforms: TikTok, YouTube Shorts

Short-form Promotional Distribution

- 10-20 short-form gameplay videos during launch phase
- Target: 10K-50K views per video
